

## Austram Rail Mount Instructions

The simplest way to install your Austram window boxes is to use our included deck rail hangers. They will allow you to hang your planter on almost any flat railing without the use of a drill.

First, examine your brackets. You will notice that the 'arm' of the bracket is mobile, which gives you the flexibility to hang them over the railing snugly. Use the illustration below to determine which way to affix your bracket to the railing.

With the bracket firmly in place, you will see that the exposed side of the bracket bears two small steel hooks. You will rest your planter on those hooks. Only two hooks are necessary for each planter.

Now that your bracket is snug and your planter is secure, you are ready to plant!
